CLEANING SAFE & EASY[®] FILTER QUICK DISCONNECTS For Qualified Service Personnel

Cleaning Instructions **Part Numbers 052572 & 060743**

Annual Cleaning Recommended

1. Remove disconnects from the filter unit.
2. Soak in a degreasing solution such as Keating Sea Powder (Part #000394).
3. While in degreasing solution, rotate the locking mechanism on Part #060743, breaking up any hardened grease inside the quick disconnect.
4. If there is a heavy build-up, you may need to soak the connectors overnight.
5. Rinse thoroughly before installing on filter.
